Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-8 and 10-12, drawn to a system and a method for identifying abnormal operation of a machine, classified in class 700, subclass 80.
 - II. Claim 9, drawn to a diagnostic apparatus, classified in class 700, subclass 26.
 - III. Claims 13-16 and 18, drawn to a system for monitoring the condition of a machine and a computer readable medium having computer executable software code stored thereon for monitoring a machine, classified in class 700, subclass 174.
 - IV. Claim 17, drawn to a programmed computer for generating control data for controlling machine, classified in class 700, subclass 86.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions Group I, II, III and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions Group I is related to a system and a method for identifying abnormal operation of a machine, Group II is related to a

diagnostic apparatus, Group III is related to a system for monitoring the condition of a machine and a computer readable medium having computer executable software code stored thereon for monitoring a machine while the Group IV is related to a programmed computer for generating control data for controlling machine.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Mr. Suzuki, Tsugihiko (Reg. No. 36,321) on 4/28/2005 to request an oral election to the above restriction requirement, but did not result in an election being made. Applicant has requested to provide a formal election/restriction requirement.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143) and non-elected claims must be canceled.
